

Beneficial Recycling is a full service plastic, cardboard, paper and metal recycling facility.

Beneficial Recycling currently services the Mining, Manufacturing, Industrial and Retail Industries in the collection and recycling of diverse streams of waste. The material it recycles is reused both in Australia and export markets.

Beneficial Recycling can manage all aspects of waste and recycling management for its clients, including the procurement, installation and maintenance of baling equipment to minimise the space taken up by such waste on clients' premises.

Operating Range

Our plants are well placed to service customers within the Queensland region. To discuss your specific needs, call our head office to be put in touch with your nearest facility:

Customised Services

Material collection — these services are tailored towards each customer's needs and volumes. How waste is removed from a customer's site generally depends on which is the most cost efficient and most convenient for them:

- Larger quantities of waste are generally sent to us by the customer.
- Smaller quantities of waste are generally collected by us.

We also collect material on behalf of others and organise the transporting of it for them.

Customer on site baling management — We can procure, install and maintain balers on your premises. This enables you to minimise the volume of waste and clutter at your site helping to ensure that you are running an efficient operation.

Re-baling — sometimes material supplied by others needs to be re-baled. We run an efficient contract baling operation.

Our Customers

We receive material from most of the major national waste transport and recycling companies. We sell to national industrial companies and also export material for recycling.

The sectors we service are:

- **The Mining Industry**
(and companies servicing the mining industry)
- **Explosive Manufactures and Contractors**
- **Wholesale and Distribution Centres**
- **Manufacturing Outlets**
- **Industrial**
- **Retail**

Responsible use of waste

The material we handle is reused in both Australia and export markets. This means that as much of your waste as possible is re-used in an environmentally responsible way.

Materials we process

We process a wide range of materials – there are three main categories:

Plastics

- Bulka Bags
- Bumper Bars
- Plastic Bottles – clear & coloured
- Wheelie Bins
